Cleaning & **Disinfection**

Specialist Contractor

protecting your **vital infrastructure**

CRL is a **specialist**

contractor with over **60 years** experience

capable of providing **comprehensive refurbishment** services

to the clean and dirty water sectors throughout the UK. CRL has an **integrated Safety,**

Health, Environmental and **Quality system** and is registered with ISO 14001, ISO 9001 and OHSAS

18001. In recognition of the company's ever increasing commitment to Health & Safety, 2018 saw CRL

presented with a **RoSPA Order of Distinction** for eighteen consecutive RoSPA Gold Medals.

Through its own School of Excellence and rigorous management systems CRL will

continue to deliver efficient, innovative solutions in a safe

and professional manner.

CRL has provided **cost-effective**

solutions, using the latest refurbishment techniques and materials,

as well as specifying work practises consistent with **best value solutions** since **1954**. CRL

understand the **importance** of **maintaining water quality** and **supply**, programming the works and the

utilisation of the assets being repaired are always foremost in mind when deciding on the materials and **repair**

methodology to be used. As such we endeavour to work with the water companies to determine the cause

of the problems at an early stage, **quantifying the repairs** to be carried out and the **timescale for the**

refurbishment works.

Condition Surveys

keeping you **in the picture**

The **British Standard** for **concrete repair** (BS EN 1504) states that a detailed inspection must be undertaken to determine the nature and extent of the deterioration. Our survey division, **CRL Surveys**, provides a **comprehensive inspection service** utilising the latest NDT techniques culminating in a report **identifying the problems** and the **repair options** available to the client. CRL Surveys has extensive experience in both the clean and dirty water sectors working directly for the water companies, framework contractors and consultants. The initial investment in condition surveys **enables clients** to undertake planned and **effective maintenance** based on sound **engineering knowledge**.

Failure to properly **maintain wastewater** assets can present **significant safety, environmental** and **financial risks**. Using the latest repair techniques and materials, **CRL** can restore **wastewater treatment plants** dealing with H₂S attack to their **original new-build standards**, as well as **substantially extending the life** of the structures. CRL also carry out the **refurbishment** of **concrete digesters, primary settlement tanks (PST's), distribution chambers, aeration lanes, storm tanks, steel surge tanks/vessels** and **inlet channels**.
